

Orange Map Puzzle: Fillomino

							2	3
	3	2	6		●		●	
			2					
	5	2	1		4	2	2	
	3						3	
●	2	1	5		5	7	9	
							2	
			●		5	2	4	
2	3							

	2		
2		5	
●	4		2
		4	

Instructions: Place numbers into the empty cells so that the grid is divided into regions of cells all containing the exact same number. Not all regions are necessarily represented by the digits in the grid. Each region must contain exactly as many cells as the number that it contains. Two regions of the same size **cannot** touch each other, either vertically or horizontally.

1	2	2	5
2	5	5	5
2	4	5	2
4	4	4	2

For Map: Copy the digits in the cells marked by orange circles into the appropriate orange circles on the map.
