Instructions: Locate the 10-ship fleet (shown to the right) in the grid. Each segment of a ship occupies a single cell. Ships are oriented either horizontally or vertically, and do not touch each other, not even diagonally. The numbers on the right and bottom edges of the grid reveal the total number of ship segments that appear in that row or column.

For Map: In the cells containing white circles, if the highlighted cell belongs to a ship, enter the size of the ship (1, 2, 3, or 4) into the appropriate white circle on the map. If the cell belongs to a sea square, enter " 7 ".
